

BREVETTI INTERNAZIONALI

CERCHIO

CERCHIO

Elasticity and rigidity.

Two conflicting needs that have to be brought together in the best rims.

This is the Campagnolo challenge to the former technical limits.

The CERCHIO rim is the winning answer to this challenge.

International patents, advanced alloys, special heat treatments, computer-designed cross-sections, angled double eyelets, micrometric anodisation setting with guaranteed tolerances: all the Campagnolo technology for a perfect geometrical shape.

High impact resistance, high tubular adherence, easy mounting, reduced vibration under braking, minimum spoke wear.

All lightness.

All Campagnolo.
